

FRESH ATACAMA HIRAMASA JAPANESE FILLET

OVERVIEW

Seriola lalandi, known internationally as Yellowtail Kingfish Hiramasa, native to the northern coasts of Chile, has all the superior characteristics of a superior marine fish, both for the characteristics of its meat, the versatility of its uses in the kitchen, as well as for the advantages of its 100% land-based farming.

The extraordinary quality of its flesh has made it gradually become a product required by the most demanding chefs in the world and by a growing market of consumers of healthy food of the highest quality.

Under the starry skies of the Atacama Desert and with the pristine waters of the Humboldt Current of the Pacific Ocean, Mercury and PCB's free, Acuinor develops the breeding of this species in its complete production cycle on land, based on responsible and sustainable aquaculture with its own first-class technology, which provides constant quality and permanent availability during the 52 weeks of the year.

Atacama Hiramasa is a superior quality product, with high protein content, rich in omega 3 fatty acids (DHA and EPA), healthy, free of antibiotics, chemicals and parasites and with excellent nutritional properties, a splendid source of health for consumers.

Product Overview

Species	Yellowtail Kingfish Hiramasa (Seriola lalandi)
Origin	Aquaculture Chile
Product Description	Japanese Fillet, Whole side, collar on, PBI, skin on
Format	IVP fillet in expanded polystyrene boxes
Quality	Premium
Shelf life	14 days from the manufacture date indicated on label
Storage	Keep between 0 to 2°C
Ingredients	100% Yellowtail Kingfish Hiramasa
Last edition date	15-06-23

Technical Specifications

Finished product size	450 gr - 1250 gr / 1 LB - 4 LB
Packaged in a box	25 - 10 pieces per box
Net weight	12 - 13 Kg
Gross weight	14 - 15 Kg
Packaging	
Polystyrene box 35 Lb	1 unit / External dimensions: 600 x 400 x 196 mm
Inner polyethylene bag	1 unit
Gelpack 400 gr.	6 unit
Outer polyethylene bag	1 unit
